MEMORANDUM FOR: Chief, Imagery Exploitation Group

SUBJECT: Request for Support

REFERENCE: The [] Document Number DK-400, Dated
28 March 1969, Titled "Imagery Interpretation
Research Program Technical Task Operating Plans"

1. In the referenced document, under Task 3, Personnel Support, the contractor has delineated certain man-hour sponsor support requirements for hardware design assistance on a number of development items, among which is "Glass for Rear Projection Viewer". The required man-hours set forth for this item will be used in a subjective test designed by []

2. Basically, the subjective testing will consist of random comparison of pairs of sample screens (from a group of eight manufactured by [] as well as comparison of each of the sample screens with a Polacoat Type LS-75 screen. In addition, subjective evaluation will be made of the resolution characteristics of the sample screens and the Polacoat Type LS-75 screen.

3. It is planned to start these tests on 3 June 1969, with completion scheduled by 27 June 1969. Approximately 138 man-hours of testing, not necessarily consecutive, will be required. Of these 138 man-hours, 42 will be devoted to the resolution evaluation of the screens and 96 will be devoted to the subjective comparison of the screens. The test viewer is the [] Film Viewer belonging to the Production Services Group and located in room 2N833. [] personnel will conduct these tests

4. IEG is requested to furnish three P.I.'s (5 1/3 days/man) to participate as subjects in the subjective comparison portion of the tests. (APSD/TSSG will furnish the personnel for the resolution evaluations.)

5. The DED Project Officer for these tests is []
